

TECHNICAL DATA SHEET

Product Name: Gum Rosin

Origin: China

Items	X	WW
Appearance	Transparent	
Color	slight yellow	light yellow
Softening Point(R & B), °C	76 Min	
Acid Number (mg KOH/g)	166 Min	
Unsaponifiable Matter	5% Max	
Ethanol Insoluble Matter	0.03% Max	
Ash	0.02% Max	

Description: There are different grades of Chinese Gum Rosin depending upon the source and the colour indexation. We have prescribed the two most superior quality grades of Gum Rosin below; WW and X Grades. Gum Rosin WW is the closest to water white colour, while grade X is a bit more yellowish.

Application: There are very many industries where Rosin contributes as a key raw material; right from paints, inks, dyes, pigments to adhesives, SBR, Butyl and other industries like polish, phenyl, explosives, Soap, Cracker, Rubber, Ink, soldering fluxes, Intermediate material for synthetic organic chemicals etc.

Packing: It is packed in the standard new galvanised iron drums of 225kgs net (232kgs gross).
