

TECHNICAL DATA SHEET

Product Name: Pentaerythritol Ester of Hydrogenated Gum Rosin

Origin: China

Solubility (with toluene1:1)	Clear
Color (Fe-Co Scale)	4-6
Acid Value, mgKOH/g, max	20
Softening Point (R&B), °Cmin	92-102
Specific gravity, 25°C/25°C	1.060~1.090

Description: Pentaerythritol Ester of Hydrogenated Gum Rosin is prepared from Hydrogenated Gum Rosin through the process of esterification with Pentaerythritol.

Application: It is used in pressure sensitive adhesives, hot melt adhesives, coatings, rubber products etc.

Packing: Granules or flakes, packed in intertexture or kraft paper bags, 25kgs net each bag.

Pallets can be provided during shipment as per requirement.
